

Suleyman Dasdag

Suleyman Dasdag was born in 1961 and graduated from the Physics Department of Dicle University Science Faculty in 1983. He received his master degree in Biophysics from the Health Science Institute of Dicle University, Diyarbakir in 1986 and also his Ph.D. degree from the same institute in 1989. His master and doctoral thesis were “Total blood, red blood cell and plasma volumes in lymphomas” and “The effects of microwave on blood parameters such as total protein, and plasma proteins, T₃ and T₄ hormones” respectively. He worked as a lecturer in Biophysics Department of Medical School of Dicle University between years of 1989-1992. Dr. Dasdag spent one year (1992-1993) as an Assistant Professor, five years as an Associate Professor (1993-1998) in the same department. Dr. Dasdag has been working as a Full Professor in the Biophysics Department of Dicle University Medical Faculty since 1998.

Dr. Dasdag studied the bio effects of ionizing and non ionizing radiations, electrical and magnetic fields. Past ten years, he usually interested in the field of bio effects of microwave, extremely low frequencies and static magnetic fields.

Dr. Dasdag is Secretary General of The Turkish Biophysical society. However, Dr. Dasdag is a member of The Bioelectromagnetics Society (BEMS), European Bioelectromagnetics Association (EBEA), and European Society for Photobiology (ESP) and Turkish Biophysical Society.

Notice: Dr. Dasdag has signed the Benevento Resolution as an expression of his own opinion. His signature does not represent the official opinion of the Turkish Biophysical Society.

Address:

Prof. Dr. Suleyman Dasdag
Department of Biophysics,
Medical School of Dicle University,
Diyarbakir 21280,
Turkey
