

Mikhail Zhadin

Mikhail Zhadin received his first higher education degree in Physics at Moscow University in 1960. He was a Ph.D. candidate in Physics and Mathematics in the Biophysics Department at the Institute of Higher Nervous Activity and Neurophysiology in Moscow in Physics in 1970; In 1982, he received a Ph.D in Biology from the Institute of Biological Physics. Since 1997, he has served as the head of the laboratory for Neurocybernetics at the Institute of Cell Biophysics, also known as the center for Biological Research, located in Pushchino, Moscow Region, Russia. His research interests have resulted in over 36 journal articles in English, four books and many talks in various parts of the world. His current research interest is focussed on the mechanism of action on an ion bound in molecules.
